FILLING MACHINES

Aerocolor P Series

Introduction

The Aerocolor 'P' Series filling machines allow pre-fill spray paint cans (already containing propellant and specific additives) to be filled with individual paints. There are two different Aerocolor filling machines to choose from, each offering advantages for different needs. Both machines fill 600ml and 400ml. The Aerocolor 'P' Series is ideal for filling medium to large volumes.

Quality & Properties

- ✓ Robust, stable machine, suitable for filling medium size orders
- ✓ All important functions directly displayed and easy to read
- ✓ Pressure regulator easy to use (working pressure 4-6 bar)
- ✓ Portable, removable piston, which fits the cylinder for easy cleaning.
- ✓ No power supply required – air only
- ✓ Very easy to operate and very safe
- ✓ Suitable for filling 600ml and 400ml cans
- ✓ Suitable for filling 1K and 2K coating qualities
- ✓ Suitable for water-and solvent-based coats
- ✓ Fast colour change

Specification

Exterior: Case made of High Grade stainless steel with door, push button operating controls cylinder – paint receptacle.

Measurements: W21 x D32 x H79 cm

System pressure: 4 - 6 bar

Working pressure: 4 bar constant

Capacity: Approx. 35-45 cans/ hr

Max. filling viscosity: 300 s/DIN 4 mm

Life: Built to last since there is almost no wear and tear

Interior: Painted in anti-graffiti paint, removable piston control head for easy cleaning or replacement. One cup does all sizes. Safety interlock on door so door must be full closed and locked to operate.

"Very good value for money – high quality product in looks, design and construction"
